# Introduction

Here you can read the legal considerations and possible risks. This section needs intensive attention. We recommend you to consult with legal, tax and other professionals when you consider an investment. You can seek an advice to help you make independent decisions about legality.

'woma city' token is a fully decentralized crypto asset. Please note that this is a summary of the risks, disclaimers and legal considerations. Users can find so many things online on the woma.city website. In order to gain the most out of this white paper, you should read it completely. The summary does not mention the location of “legal considerations”. To invest in this crypto asset, all factors must be considered and evaluated. There are no expectations for \$WOMA token and its team not considered yet. This token is a community-operated decentralized financial token to create a new metaverse.

'woma city' whitepaper is a living document. This document contains philosophical underpinnings, technical foundations, and the economic model. Any information presented in this document is subject to change and will be updated regularly. The basic structure presented in the document will remain the same, however, any major change will be announced prior to implementation, on social forums and the website of 'woma city'.

# Disclaimer

The information in this white paper may be changed or updated, and should not be interpreted by the 'woma city' team or any other individuals or organizations mentioned in this white paper as a promise or promise of the future availability of services related to the use of tokens or their future performance, value or guarantee.

This document does not constitute an offer or solicitation to sell stocks or securities. It does not form or form part of it, nor should it be construed as any offer or sale or subscription or any invitation to purchase or subscribe for any securities, and it or any part of it should not form the basis or reliance of any contract or commitment. 'woma city' expressly disclaims any liability for any direct or consequential loss or any direct or indirect damage caused by relying on any information contained in the white paper, any error, omission or inaccuracy in any such information, or any direct or consequential loss or any direct or indirect damage caused thereby.

This is not a recommendation for purchase or financial advice, it is strictly information. Do not trade or invest in any tokens, companies or entities based solely on this information. Any investment involves significant risks, including but not limited to pricing fluctuations, insufficient liquidity, and the possible complete loss of principal. Investors should conduct independent due diligence on the topics discussed in this article with the assistance of professional financial, legal and tax experts, and make independent judgments on the relevant market before making any investment decisions.

We have prepared all information from sources that we believe are accurate and reliable. However, such information is provided "as is" without any guarantee, whether express or implied. All market prices, data and other information are not guaranteed for completeness or accuracy. They are based on selected public market data and reflect the current situation and our views from this date. Therefore, all of these conditions may be unannounced. The circumstances change. Graphics, charts and other visual aids are for reference only. None of these charts, graphs, or visual aids themselves can be used to make investment decisions. There is no indication that these will help anyone make investment decisions, and there are no charts, graphs, or other visual aids that can capture all the factors and variables needed to make such decisions.

The information contained in this document may include or incorporate forward-looking statements, which will include any statements that are not statements of historical facts. No representations or warranties are made regarding the accuracy of such forward-looking statements. Any predictions contained in this document are necessarily speculative and based on certain assumptions. These forward-looking statements may prove to be false and may be subject to inaccurate assumptions or known or unknown risks, uncertainties and other factors, most of which are beyond our control. It can be expected that some or all of these forward-looking assumptions will not be realized, or that there will be significant differences from actual results.

## woma city

'woma city' is a decentralized organization (DAO) operated by each internet-native member of the 'woma city' and share one common vision of building a brave metaverse.

'woma city' has been designed as a metaverse what is a digital reality that combines aspects of social media, online gaming, augmented reality (AR), virtual reality (VR), and cryptocurrencies to allow users to interact virtually. Augmented reality overlays visual elements, sound, and other sensory input onto real-world settings to enhance the user experience. In contrast, virtual reality is entirely virtual and enhances fictional realities.

As 'woma city' metaverse grows, each member will create online spaces where user interactions are more multidimensional than current technology supports. Instead of just viewing digital content, users in the metaverse will be able to immerse themselves in a space where the digital and physical worlds converge.

Today in 2021, people have a preliminary understanding of the concept of the virtual world. In the future, the meta-universe will be a trend. People will realize identity, social interaction, immersion, low latency, diversification, anywhere, and economy in the virtual world. For a series of goals such as system and civilization, we were originally a team focused on the creation of digital humans.

All big dreams begin with small steps. We are as woma.city team excited to be a part of digital technology transformation where the metaverse is being shaped and developed.

# Blockchain

Blockchain is a system of recording information in a way that makes it difficult or impossible to change, hack, or cheat the system.

A blockchain is essentially a digital ledger of transactions that is duplicated and distributed across the entire network of computer systems on the blockchain. Each block in the chain contains a number of transactions, and every time a new transaction occurs on the blockchain, a record of that transaction is added to every participant's ledger. The decentralized database managed by multiple participants is known as Distributed Ledger Technology (DLT).

Blockchain is a type of DLT in which transactions are recorded with an immutable cryptographic signature called a hash.

## The Properties of Distributed Ledger Technology (DLT)

### Programmable

A blockchain is programmable (i.e. Smart Contracts)

### Distributed

All network participants have a copy of the ledger for complete transparency

### Secure

All records are individually encrypted

### Immutable

Any validated records are irreversible and cannot be changed

### Anonymous

The identity of participants is either anonymous or pseudonymous

### Unanimous

All network participants agree to the validity of each of the records

### Time-stamped

A transaction timestamp is recorded on a block

This means if one block in one chain was changed, it would be immediately apparent it had been tampered with. If hackers wanted to corrupt a blockchain system, they would have to change every block in the chain, across all the distributed versions of the chain.

## Binance Smart Chain

\$WOMA will be built on the Binance Network. 'woma city' is delighted to be supported by Binance and is proud to announce that the project has secured investment from Binance.

Binance is the most active layer-2 BNB scaling solution that exists in the market today. The 'woma city' team has decided to build on Binance due to its high speed, low cost transactions and the overall compatibility of the network. This will allow us to connect, develop and most importantly develop at scale on the Binance network. The power of Binance is that it provides a credible layer of trust for users. It has significant advantages over other networks allowing scalability, security and overall better user experience.

# GameFi

GameFi as the combination of video games (Gaming) and decentralized finance (DeFi). The technology used for this type of video game is blockchain technology, which allows players to be the sole and verified owners of the virtual elements of the game.

In traditional video games, the predominant model is “pay-to-win”, in which players must pay in order to gain an advantage, such as upgrading, reducing waiting time or buying a virtual object.

GameFi, on the other hand, introduces the “play-to-earn” model. In this case, players are the ones who make money thanks to their knowledge or the time invested.

It is important to highlight that in GameFi games users need more than just luck in order to win. The activities that generate rewards vary depending on the game, but in general they reward skills and require strategy.

GameFi is not gambling. The games we consider part of this emerging sector require players to leverage a mix of skill and strategy to generate income. Although luck may be a part of these games, it is not the predominant factor in determining who wins or is eligible for financial reward.

## GameFi with DAOs

Typically, video game development has been highly centralized. A studio will design, produce and publish a title, taking sole responsibility for any future updates. However, many GameFi projects seek to extend decision-making to the players themselves.

The mechanism by which they achieve this is known as a decentralized autonomous organization. In a DAO, token holders can produce and vote on project update proposals. Often these proposals will have a direct impact on the title's monetary features. For example, the DAO may vote to increase the reward for a certain action within the game as a means of promotion.

To join a GameFi DAO, you must first own a project's governance token. Often, the number of tokens held is directly proportional to a member's voting power. Essentially, the largest stakeholders have the loudest voices when it comes to steering a project's direction.

'woma city' aim to be the leading NFT token out there, as much as the world is interested in playing video games and earning tokens at the same time, holders of NFT will be able to play 3D reality virtual games and still earn with it .

## woma city NFTs

The first three NFT collections of 'woma city' which are called 'woma on the way', 'woma city passport' and 'wo&ma' already published with specified smart contracts on OpenSea where is one of the biggest NFT marketplace.

With the establishment of the 'woma city' NFT marketplace will be possible to buy-sell-create to NFT's with \$WOMA token.

### wo&ma Collection

wo&ma is a collection of 999 unique 1/1 animated artwork belongs to woma city main characters.

wo&ma have been designed unique and aesthetically metaverse characters. Each NFT carries full of action and excitement.

<https://opensea.io/collection/woma>

## woma city passport Collection

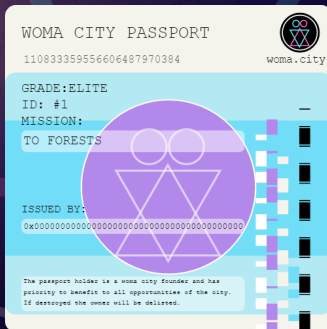

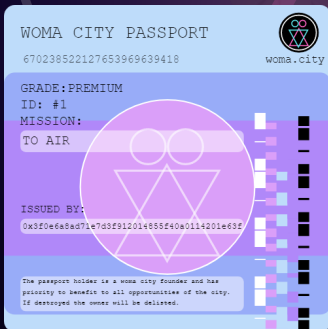

'woma city passport' is a collection of unique and fully onchain NFT in Polygon Mainnet blockchain. Two types of passports are available to mint.

Premium Passport minting is limited up to 2999 NFT's and no quantity minting limit on Elite Passport until minting time is run out.

The passport holder is a 'woma city' founder and priority to benefit to all opportunities of the city. Whitelist on Pre-Sale, airdrop NFT's and \$WOMA token.

The wallets that mint their own passports before the pre-sale starts are added to the whitelist and they have priority right to buy in the first 12 hours of the pre-sale of \$WOMA.\*

Totally 18% of \$WOMA token has been reserved for passport holders before pre-sale and the tokens are locked under 'Team Vesting Tokens' wallet.\*\*

<https://opensea.io/collection/woma-city-passport>

\*Details on page 16 \_ Pre-Sale

**\*\*Details are on Page 19\_Airdrop Tokens to Passport Holders**

## 'woma on the way' Collection

The first NFT collection of 'woma city' to unique, cool and diverse wo&ma with their van.

'woma on the way' is 10.000 randomly generated pixel collectibles of various rarity living on the Polygon blockchain as ERC-721 tokens and hosted on IPFS.

- Number of traits : 26
- Number of attributes : 478
- Minimum number of used traits : 26

## woma city Token (\$WOMA)

'woma city' token (\$WOMA) was released dated on December 20, 2021. It starts with decentralized exchanges, NFTs and GameFi projects. \$WOMA token is our native BEP20-based token first built on the Binance Smart Chain.

\$WOMA Token is an audited, vetted and trusted static reward token that benefits investors who hold, the contract is designed to apply 9% tax to every transaction. 3% is distributed to the current holders, 3% goes to liquidity pool to maintain healthy liquidity and 3% goes to marketing pool to development the project.

\$WOMA token holders will gain early access to all coming projects & NFTs launches by 'woma city' first before anyone else.

There will be anti-bot system powered by PinkSale in place to insure holders gain fair access and trading.

Totally 10% of \$WOMA token has been reserved to burn as reference with the project milestones. The tokens are locked before pre-sale at the addresses above until unlock(burn) date.

If the milestone is reached before relevant unlock date, the tokens burned directly and send to DEAD address. If not, lock-in time is extended taking into account target milestone.

# Airdrop Tokens to Passport Holders

'woma city' passport is unique and onchain on the Polygon Mainnet blockchain with two types as 'Premium and Elite'.

Totally 18% of \$WOMA token has been reserved for passport holders before pre-sale and the tokens are locked under 'Team Vesting Tokens' wallet.

Passports are able to mint until 30 June 2022, 23:59 UTC and the first release and airdrop to passport holders will start 30 days after. Detailed schedule below.

Release No	Release Date	Release Token Numbers	Airdrops Period	Tokens For Premium Passport Holders	Tokens For Elite Passport Holders
Rel.01	30/06/2022	180.000.000	1 to 5 days	100.000.000	80.000.000
Rel.02	30/07/2022	180.000.000	1 to 5 days	100.000.000	80.000.000
Rel.03	29/08/2022	180.000.000	1 to 5 days	100.000.000	80.000.000
Rel.04	28/09/2022	180.000.000	1 to 5 days	100.000.000	80.000.000
Rel.05	28/10/2022	180.000.000	1 to 5 days	100.000.000	80.000.000
Rel.06	27/11/2022	180.000.000	1 to 5 days	100.000.000	80.000.000
Rel.07	27/12/2023	180.000.000	1 to 5 days	100.000.000	80.000.000
Rel.08	26/01/2023	180.000.000	1 to 5 days	100.000.000	80.000.000
Rel.09	25/02/2023	180.000.000	1 to 5 days	100.000.000	80.000.000
Rel.10	27/03/2023	180.000.000	1 to 5 days	100.000.000	80.000.000

'woma city' passport is an onchain NFT and each wallet can made the trading (buy/sell) via to OpenSea & Metamask. Therefore, airdrop tokens will be transfered only the end wallets according to the mentioned release dates above.

Token airdrops will be done manually and completed in 1 to 5 days.

# Roadmap

- Website Launch
- Social Media Launch
- NFT Collections Launch
- Audit Launch
- White Paper Launch
- Create Launchpad to Pre-Sale
- Pre-marketing Campaign
- Pre-start to Game Development

**Q4  
2021**

**Q2  
2022**

- Pre-Sale Launch
- Public Sale Launch
- Coingecko listing
- Coinmarketcap listing
- Creating new NFT collections
- Wallet Development - Phase-1
- Game Development - Phase-1
- NFT Market Place - Phase-1
- Marketing Campaigns
- Giveaways / Promotions

**Q4  
2022**

- Expand the Development Team
- Mobil App Development to Social Media
- Wallet Launch
- NFT Market Place Launch
- Game Development - Phase-2
- Charity Action
- CEX Listing
- Partnership Cooperation's
- Giveaways / Promotions
- Influencers

**Q2  
2023**

- Game Demo
- Game Development - Phase-3
- More CEX Listing
- More Partnerships & Cooperations
- Charity
- Website Update
- Several Updates
- Giveaways/promotions
- Expand Marketing Strrategy

# Community & Ambassadors

'woma city' community is rapidly growing and on its path to becoming one of the most well-liked NFT-MetaVerse-GameFi communities. We welcome open discussion and truly believe that that community is a source of strength.

For us, community is a farm back and lever to drive us to constantly develop in response to the trust that users give us, so we consider creating and building a quality community to be one of the most crucial in determining the project's success or failure.

'woma city' launched the Ambassador Program aimed at building a community that will promote the project across different countries and communities online. woma city rewards program is aimed at encouraging both developers and non-developers to contribute diverse content, both offline and online. To accomplish this goal, woma city has kept aside a portion of woma city tokens or NFTs as rewards to bootstrap the initial community. The goal is to have motivated ambassadors promoting the woma city brand to businesses, enterprises, and potential users across the globe.

As you grow your local 'woma city' community, by completing achievements, you will be eligible to earn. These awards are our way of thanking you for your commitment to the community.

Check out the list of achievement rewards below or submit your own offer and start earning today!

- Share a post on Instagram - Twitter - Facebook
- Host an event
- Online Webinar \ Workshop \ Attend Webiner \ Web Conference hosted by \$WOMA
- Manage the local social media channels of WOMA

To became an ambassador of 'woma city' you can fill and submit to the application form on web site.

'woma city' reserves the right to make changes on ambassador reward program.

## Transparency

We understand that transparency is critical to gaining communities trust, thus we are always explicit in what we do, as seen by the specific and feasible roadmap, detailed and logical tokenomics, open and progressive community.

We value the community and believe that for the 'woma city' project to succeed, every step must be build on the foundation of complete transparency.

# Investors Safety

Our smart contracts are fully audited and have been carefully designed so that in all situations, the raised BNB and tokens reside securely in the smart contract. Under no conditions will the Admin or Campaign owner be able to transfer the tokens. The only conditions under which is that the BNB or tokens can be transferred are:

1. Successful IDO (met soft-cap). 2. Failed IDO or Cancelled IDO

In both situations, the BNB/tokens are sent or returned to the rightful owners/users. In other words, no Admin or Campaign owner can take investor funds.

2.Locked Liquidity Pool

Liquidity pools enable users to buy and sell crypto on decentralized exchanges and other DeFi platforms without the need for centralized market makers.

Therefore \$WOMA Token liquidity pool will be locked for 5 years and 3% fee of each transaction goes to liquidity pool to maintain healthy liquidity.

# Legal Disclosure

The data contained in this white paper does not constitute financial and investment advice and is not treated as the content of a publication. This material is an offer or solicitation to invest buy, or sell for informational purposes only. No warranty is given or implied about the completeness or accuracy of the information. The team does not recommend buying or selling cryptocurrencies. Before making an investment decision, you may consult a financial adviser and do your due diligence.

# Risk Disclosure

Keep in mind that smart contracts always carry risks. You must use them at your own risk. All content in the publication is for guidance and educational purposes only. All information contained here must be reviewed and verified. Therefore, you need to be aware of the risks associated with trading in financial markets. We recommend that you do not trade for an amount that you cannot afford to lose.

WITH THE  
**woma** city  
ANYTHING IS POSSIBLE  
EVERY COMMUNITY MEMBER SHOULD FEEL  
CONFIDENT, VALUED AND RESPECTED  
NO HATRED ONLY LOVE
